ABOUT TRILINK

Trilink is a UAE-based provider of advanced networking and security solutions, delivering reliable, high-performance infrastructure for modern businesses.

We specialize in enterprise networking, surveillance connectivity, and access control systems, offering solutions designed for stability, scalability, and long-term performance.

Our product range includes PoE switches, wireless bridge systems, routers, RFID solutions, biometric devices, and UHF systems, enabling seamless connectivity and secure operations across various industries.

At Trilink, we focus on practical, cost-effective, and future-ready solutions that help businesses build strong and secure technology foundations.

OUR VISION

To become a trusted networking and security solutions provider in the UAE and international markets by delivering reliable, innovative, and future-ready technologies.

OUR MISSION

To provide high-quality networking and security products that ensure seamless connectivity, enhanced protection, and scalable infrastructure for growing businesses.

INDUSTRIES **WE SUPPORT**

Trilink supports a wide range of industries by providing reliable and high-performance networking solutions tailored to diverse business needs.

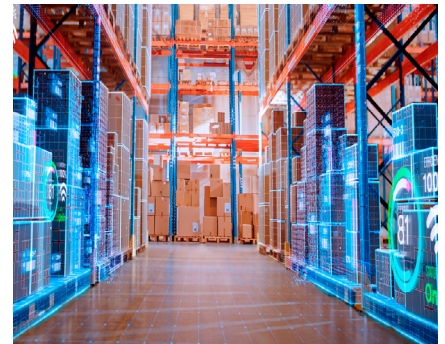

CORPORATE OFFICES

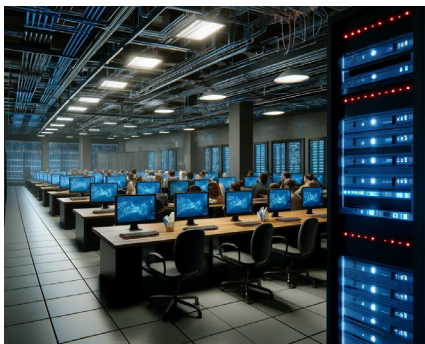

RETAIL & SHOWROOMS

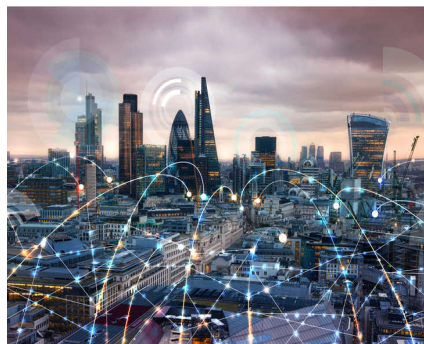

WAREHOUSING & LOGISTICS

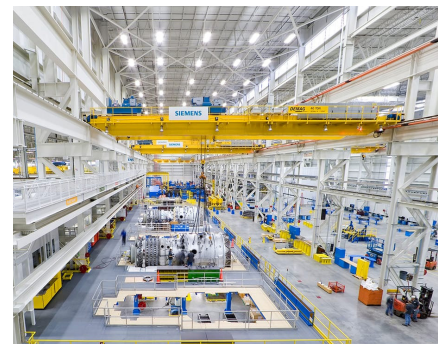

EDUCATIONAL INSTITUTIONS

HOSPITALITY (HOTELS & RESTAURANTS)

INDUSTRIAL & MANUFACTURING

IT & TELECOM

OUR CORE **STRENGTH**

- Strong expertise in surveillance and security networking
- Reliable PoE infrastructure solutions
- Cost-effective, enterprise-grade products
- Designed for UAE business environments
- Easy deployment with scalable architecture

WHY CHOOSE TRILINK

Trilink delivers high-performance and reliable networking products built to meet modern business demands. Our innovative and future-ready technology ensures seamless connectivity and long-term efficiency.

HIGH-PERFORMANCE AND RELIABLE NETWORKING PRODUCTS

We deliver robust networking products designed for consistent performance, ensuring stable connectivity and minimal downtime for your operations.

INNOVATIVE AND FUTURE-READY TECHNOLOGY

Our solutions are built with advanced technology to support evolving digital needs, keeping your business ahead in a competitive landscape.

SCALABLE SOLUTIONS FOR GROWING BUSINESSES

We offer flexible networking solutions that easily adapt and scale as your business expands, without compromising efficiency.

STRONG FOCUS ON QUALITY AND PERFORMANCE

Every product is developed with strict quality standards to deliver exceptional performance and long-term reliability.

DESIGNED FOR MODERN ENTERPRISE NEEDS

Our networking solutions are tailored to meet the demands of modern enterprises, ensuring security, speed, and seamless integration.

WHAT WE OFFER

AI-Enhanced PoE Switches

8-Port Uplink Gigabit **AI-Enhanced PoE Switch**

The TRILINK TL-SW8P-2U1S is ideal for:

- IP CCTV systems
- Wireless access points
- IP phones
- Office networks
- Retail environments

Power your surveillance and network infrastructure with intelligent, stable, and high-performance connectivity. The TRILINK TL-SW8P-2U1S is a compact, enterprise-grade AI-Enhanced PoE switch engineered for professional networking and surveillance deployments.

16-Port AI-Enhanced **PoE Switch**

The TRILINK TL-SW16P-2U1S is ideal for:

- Medium-scale CCTV surveillance systems
- Office & enterprise networks
- Warehouses and industrial environments
- Access control systems
- Commercial security installations

The TRILINK TL-SW16P-2U1S is a professional-grade AI-Enhanced PoE switch designed for medium-scale surveillance and enterprise networking environments. Built to deliver stable power and high-speed data transmission, it features 16 PoE Fast Ethernet ports, 2 Gigabit uplink ports, and 1 Gigabit SFP uplink port, ensuring seamless backbone connectivity for demanding installations.

24-Port AI-Enhanced PoE Switch

The TL-SW24P-2U1S is ideal for:

- Large-scale CCTV surveillance systems
- Industrial and factory networks
- Campus and building deployments
- Enterprise security infrastructure

The TRILINK TL-SW24P-2U1S is a high-capacity AI-enhanced PoE switch engineered for large-scale surveillance systems and enterprise network deployments. Designed to deliver stable power and high-performance data transmission, this switch provides intelligent networking for demanding environments such as factories, campuses, commercial buildings, and security infrastructures.

Digital Wireless Bridge Point to Point 2.4GHz

The TL-SW24P-2U1S is ideal for:

- Building-to-building wireless connectivity
- CCTV and surveillance systems
- Elevator and remote monitoring
- PtP and PtMP network expansion

The TRILINK TL-WB23500 Wireless Bridge is a high-performance wireless bridge designed for stable and reliable long-distance data transmission in both indoor and outdoor environments.

Access Control

Delivering advanced access control solutions designed for modern security environments. TRILINK provides reliable readers and controllers for smarter, safer, and more efficient access management.

RFID & Cards

Secure and efficient RFID cards designed for modern identification and access systems. TRILINK provides reliable smart card technology for seamless authentication and access management.

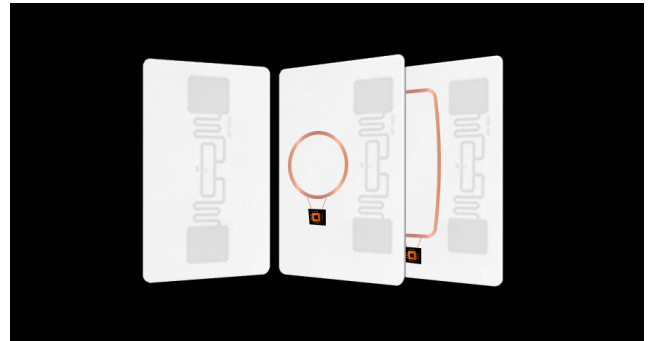

Locks & Exit Buttons

Reliable locking systems and exit control devices designed for secure access management. TRILINK provides durable electric locks and exit buttons for safe and efficient entry control.

Biometric Devices

Advanced biometric devices designed for accurate identity verification and secure access management. TRILINK provides reliable fingerprint and facial recognition solutions for modern security environments.

UHF Systems

We provide advanced UHF Reader Systems designed for fast, accurate, and long-range identification and tracking. Our solutions are ideal for applications such as access control, vehicle management, asset tracking, warehouse automation, and logistics operations.
